President of ICOMOS Macedonia National Committee (2014-2020)

PLATFORM / PLATE-FORME / PLATAFORMA

Since my initiative for establishment of ICOMOS NC of Macedonia in 1994, and as its first President, since today, I try to be an active and productive member of our INGO, on National as well on International level.

The main reasons why I am applying my candidature for Board member of ICOMOS (period 2017-2020) are the following:

I would like to be the member of the team (Board) who will try to improve the activities of our INGO professional organisation in many fields, as are the follows:

- 1) to rise of the significance of the Advisory Committee on the maximum level, as one the most important pillar of our organization, in the overall activity of our organization;

- 2) to increase the significance of ICOMOS activities on international, regional and national level;
- 3) to doing the best for prevent and to stop non adequate and appropriate decision of all organizational bodies of ICOMOS in the future;
- 4) to strength of the transparency and accountability of all organization's bodies and timely and diligent informing of each single member of ICOMOS, requiring active its participation in organization's activities;
- 5) to develop greater activities of organization at regional and national level by forming new sub-regional groups and urging establishment of bilateral and multilateral cooperation between NC;
- 6) to increase the cooperation of ISC and NC on specific topics for better treatment of the cultural heritage;
- 7) to change the period of 3 to 2 consecutive mandate (maximum) of ICOMOS Officers in charge to allow most frequent new ideas and efforts of the new members if the governing bodies of our organization;
- 8) to change the regulation of 4 category of Voting rights of National Committee accordingly only by the number of individual members because its National committee of ICOMOS has to have equal rights with all others (not only by the number of members) because we have to underline the capacity and background of each single member/National Committee of our Organization, which have to be similar for all member of ICOMOS;
- 9) attracting young members (students and young professionals) and initiating transfer of knowledge to them as a FUTURE of our organization.
