## Platform statement – Hae-Un Rii

ICOMOS is the organization to work for the conservation and protection of cultural heritage places and is a network of experts from all different academic fields over the world. Based on my experience as a Board member of ICOMOS for 9 years, an officer of ADCom for 3 years, the president of ICOMOS-Korea for 6 years, and a member of ISCs for 20years, I fully understand we all should share our experiences and work together.

Thus, I would like to make a goal for ICOMOS with **Altogether, Balanced, Cultural Community** and **Sustainable Development**. This is my aim from the beginning when I started to involve the ICOMOS activity.

For **Altogether** and **Balanced**, I will try to help and support for organizing new ISCs and for working together among ISCs. Diverse subjects and experiences from all ISCs are very important resources for the conservation and preservation of valuable cultural heritage. When we work together and share our information and experiences though networking among members of NC and ISCs, we might reduce the gap and achieve the balanced cultural heritage conservation in the regions and subjects.

For **Cultural community** and **Sustainable Development**, I will encourage and support the Emerging professionals to be the cultural heritage leaders for future generation, help people both students and public to recognize the importance of conservation and preservation of cultural heritage for our next generation through special lectures and other activities, and try to increase the number of ICOMOS membership for Emerging professionals.

## Statement confirming the willingness to serve

I, Hae-Un Rii, stand for an officer of International Scientific Committee of Advisory Committee.

I confirm I will do my best to accomplish my duty as an Officer of International Scientific Committee, if I am elected the position at the 2018 Advisory Committee meeting of ICOMOS in Buenos Aires, Argentina.
