Acknowledgements - Remerciements

The Swiss National Committee expresses its deepest gratitude to the following persons, institutions and businesses for their invaluable contribution and help without which the ICOMOS 1990 International Symposium could not have taken place.

Le Comité national suisse exprime sa gratitude la plus vive à l'égard des personnes, institutions et entreprises suivantes sans la précieuse aide desquelles le colloque international ICOMOS 1990 n'aurait pas pu avoir lieu.

Very special thanks must go to:

Nos remerciements tout particuliers s'adressent à:

M. Raymond Junod,

for his unfailing support in this difficult entreprise.

pour son soutien infaillible dans cette difficile entreprise.

Mme Fawzia Tobgui,

for taking care of the edition and printing of the symposium proceedings,

pour s'être chargée de coordonner l'édition des actes du colloque et l'impression.

Mme Nicole Miéville,

for the huge work of multilingual re-typing of papers,

pour l'énorme travail de dactylographie des communications dans plusieurs langues.

ICOMOS

The International Council on Monuments and Sites (ICOMOS) is the only international, non-governmental organization bringing together people and institutions actively concerned with the conservation of buildings, groups of buildings and larger units of architectural, archeological and historical interest. ICOMOS works to promote the application of theory, methodology and scientific techniques to the conservation of architectural heritage.

Both nationally and internationally, it is directed by its members, which are grouped in 66 National Committees. A network of International Committees has been established to coordinate research and projects of members in specific fields of preservation and conservation of architectural heritage, including archeological heritage management, cultural tourism, historic gardens, historic towns, mud brick (adobe), photogrammetry, rock art, seismology, stained glass, stone, training, vernacular architecture and wood.

ICOMOS was founded in 1965 in Warsaw, Poland, by the conservation and preservation professionals, meeting at the 2nd International Congress of Architects and Technicians of Historic Monuments. At the same meeting, the founders of ICOMOS drafted and adopted the International Charter on the Conservation and Restoration of Monuments and Sites, more commonly known as the Venice Charter.

ICOMOS has six principal objectives:

- to bring together conservation specialists from around the world and serve as a forum for professional dialogue and exchange;
- to collect, evaluate and diffuse information on conservation principles, techniques and policies;
- to cooperate with national and international authorities on the establishment of documentation centers specializing in conservation;
- to work for the adoption and implementation of international conventions on the conservation and enhancement of architectural heritage;
- to participate in the organization of training programs for conservation specialists on a worldwide scale; and to put the expertise of highly qualified professionals and specialists at the service of the international community.
