BILOGRAPHIE

1809 1900

1900 1936

9. HIRSCHWALD J. (On the electrical Kataphoreosis of distilled water through porous lime diaphragms and especially in connection with temperature and current density).

10. KIESLINGER A. Testing of natural building stones as regards the behaviour of atmospheric factors. Berlin 1900 (in German).

1949

xxx Beckämpfung von Bau durch feuchtungen Bow- kundig wolked, nr. 43/1949. (The fight upon building moistening).
1951

1952

1953

27. FLUGGE Richard. Die Feuchtigkeit im Hochbau. VEB Carl Marhold Verlag, Halle 1953. (The moisture in Buildings)

1954

1957

39. BLACK, U. F. M. and CRONEY. D. Pure water pressure and moisture content studies under experimental movement. In Proceedings of the 4th International Confe-
40. FEVRE JEAN  
La conservation des monuments en pierre.  
Rythme, nr. 23.

41. GRABSKI Wladislaw, NOWAK Jan  
The deterioration problem of stones in old buildings of Krakow (in Polish).  
Materialy Budowlane, nr. 2.

42. KIESLINGER A.  
(Protection among moisture in buildings).

43. SARETK  
Enduits : composition et pose.  

44. SOEIRO P. A.  
Succion. In : Annales de l'Institut Technique du Bâtiment et des Travaux Publics,  
r. 110. p. 119-123, 1958.

45. BARBER S. E.  

46. Diczok J., LIPCSEY Miklos  

47. XXX  
The drying of moisted walls by the electroosmosis method in Hungary.  
Vystavba a Architektura (CSR) nr. 12/1958, p. 16-17 (in chec).

48. GRABSKI Wladislaw, NOWAK Jan  
On the problem of patina formation on the Pintchowsk limestone (in Polish).  
Czasopismo techniczne, nr. 7/1958.

49. MASSARI Giovannii  
Risanamento igienico dei locali umidi.  
Hoepli 1958.

50. MORARU Dinu, and SPOIALA L.  
Restoration and consolidation principles and methods used in Rumania for architectural and historical monuments (in Polish) (Ochrona Zabytkow, 3-4. In French, in the volume:  
"Congrès International des Architectes et Techniciens des monuments Historiques,  

51. SCHAAD W.  
Anwendungen der Elektro-Osmose im Gebiete des Grundbaues: Die Bautechnik nr. 6, pag. 210/1958 (The applications of electro-osmosis in the foundation field).

52. WINTERKORN F. H.  

53. BELLUIGI A.  

54. BELLUIGI A.  
Elettroconsolidamento di un pendic argillosi franante, Metano, petrolio e noure energie.  
Padova. 1/1959.

55. BUTIGN, S. and WIESLLING  
Determination of the capillary conductivity of soils at low moisture tension. In : Nether- 
lands Journal of Agricultural Science, nr. 2, pag. 155-159.

56. KERR, A. D.  
A study of the effect of the capillary zone on the flow through homogenous earth dams.  
In : Geotechnique IX, nr. 2, pag. 59-61.

(Protection measures against moisture).

58. MURARO M.  
Applicazioni ellettrocinetiche. Italia Nostra, nr. 11.

60. BELLUIGI A. Bifilarita elettrodiche aperte e chiusie nei Procidei EGO. Annali di Geofisica, i/1960, Rema.

61. JÖRGY János The drying of moistened walls by electric current (in Hungarian). Ezermester, October.

62. MURARO M. I Lavori di consolida
tamente eseguiti de R. Czebretowicz nelle terreno delle villa Nationale di Stras.
Italia Nostra nr. 18/1960.

76. FRANK E. Überblick über den Entwicklungstand der Erkenntnisse auf dem Gebiet der Elektroosmo-

78. GENSEL Joachim Elektroosmatische Trockenlegung von Alt-
baumen. Bauzeitung (DDR) nr. 21/22-1962, p. 587-594. (Electroosmosis drying methods of old build-
ings).

79. HOLMES W. J. Electroosmotic damp proofing. The arch
et building news (England) nr. 47; 21 Nov. 1962; p. 767-769.

80. JENKS I.H., WRIGHT T.E., GODDARD H.P.

81. xxx

82. ORZOL Erich, NIENDORF H.

83. POULVASSILIS A.

84. ZIEN J. H.

1963

85. ANDREI Silvan an SBENGHE R.
The utility of the study from energetical view point of the water-disperse body system in soils and earthy rocks (in Rumanian). Soil Science nr. 1, 1963, Bucharest.

86. COREMANS Paul.

87. xxx

88. HURST H.

89. KEIL K.
Aufgabe und Funktion des Tons in den anorganischen Dichtungen des Erd- und Wasser-}

baues. Der Bauingenieur nr. 11, 1963. (The part and meaning of clays as anorga-

cial medium used in hydrotechnical and under- ground works).

90. KIESLING A.
Verwitterungseinflüsse an Ziegelmauerwerk. Die Wienerberger 3/1963. (Intemperies in-
fluences on brickworks).
