CANDIDATS AU POSTE DE PRÉSIDENT
CANDIDATES FOR THE POST OF PRESIDENT

Nikos Agriantonis
Grèce / Greece

THE “TEN COMMANDMENTS” FOR THE GOOD ICOMOS

1. ICOMOS is an International non-governmental Organization which acts independently from the States. We have to safeguard this independence as efficiently as possible.

2. ICOMOS promotes cultural and political protection of the Monuments and Sites to the international organizations and States at scientific, theoretical and administrative level. This promotion is achieved by the intervention of the national ICOMOS Committees, the International Scientific Committees of ICOMOS and by informative activities of great importance. **Today, the 40–50 active national ICOMOS Committees, the 10 active International Scientific Committees as well as the non-existent central activities are not sufficient to give the authority needed.**

3. Balances alone are not enough to develop an international organization without a vision. **When there is no vision there is no coherence in an organization with negative consequences for ICOMOS.**

4. ICOMOS, among others, is objectively a “Groupe de Pression”. This dimension has never been valorized. Thus, the effectiveness of our interventions is modest. And of course, the objectives have never been clarified to the 40,000 members. The 7,000 existing members today, give us very low possibilities.

5. Our main policy aims at the participation of young people to strengthen the development of the movement for the protection of monumental heritage. **Unfortunately, today, gerontocracy is the rule.**

6. The continuous interventions of ICOMOS in the dominancy regarding the “heritage in risk” as well as theoretical problems of monuments protection, make the valorization of the media imperative. **In recent years, in the ICOMOS we are not aware of this kind of action. Today T.V. and press are, unfortunately, unknown to ICOMOS. Whereas, collaborations with other similar international organizations are not promoted.**

7. The need for decent ICOMOS Headquarters in Paris, well-paid staff, an adequate data base including files and modern e-systems, require 1500m2 at least. **Unfortunately, the existing situation is disappointing with the 300m2……**

8. Participation in important international programs (not only those of UNESCO). The amelioration of the programs mainly the “World Heritage List” with monitoring systems have been kept for years only on paper. **At the same time, new youth ICOMOS programs are neither supported actively nor are they promoted.**

9. The “Blue Shield” program, which is of great importance, is an indispensable element for ICOMOS existence. Each political authority would support it, if this program was developed in a serious way. **Today, the “Blue Shield Program” has been, entirely, forgotten!**

10. However, all these need funding: funds from the State, from international organizations, from sponsors, from special contract projects etc., but to achieve all these, promotion of our field is necessary. We all know that ICOMOS without financial support cannot survive!!!
In the last years, we have been waiting fatalistically without expecting any economic policy or dynamic planning!!!
The State funds have been diminished and potentially will disappear. Whereas, we are not in search of sponsors and neither actions are taken to bring in funds. How can we obtain 10 million dollars annually, which are required for a real the development of ICOMOS?

With all these facts, your vote is needed for a change, for a three-year period only. A lot can happen in three years!!
A ten-year dinosauric period is really a very dangerous period!!!

Ps. Nikos Agriantonis, who had these visions,, does not consider the President neither the Secretary General nor the Treasurer and the Vice Presidents responsible for the above mentioned, but it is his strong belief that the whole conception and attitude must change.

Year of birth: 1944
Place of birth: Athens
Languages spoken: Greek, English, French

- 1962 – 1967 Studies and Diploma in Architecture-Engineering at the Metsovio National Technical University of Athens
